

ACM Online Courses

The ACM online course program includes full access to over 3,200 online courses in multiple languages from Element K®. These courses are open to ACM Professional and Student Members on a wide range of technical and business subjects.

Refresh your skills, learn new topics, explore new areas of computing and information technology, or deepen your knowledge in areas that are already important to you. ACM's online course program is designed to help all ACM members grow in the profession, and gain access to the resources needed to stay on top of relevant and important trends in computing and IT. www.acm.org/pd

These self-paced courses offer access to top technology vendors and their experts, including authorized training for Microsoft, Cisco, Sun, IBM, and Adobe. The ACM program also provides access to hundreds of e-Reference books, Brainbench Examinations, course assessments, and Blended Blue Prints (accompanying business library content).
